

Jira Ticketing System Lab

Overview

This lab demonstrates the use of Jira Service Management to manage IT support incidents and service requests. The objective was to gain hands-on experience with ticket creation, assignment, prioritisation, status tracking, troubleshooting documentation, resolution, and closure while following industry-standard IT service desk processes.

Technologies Used

- Jira Service Management
 - Windows 11
 - Web Browser
 - IT Service Management (ITSM)
 - ITIL Service Desk Concepts
-

Lab Objectives

- Create and manage support tickets
 - Assign tickets to support technicians
 - Set ticket priorities
 - Track ticket status throughout the lifecycle
 - Document troubleshooting activities
 - Resolve incidents and service requests
 - Close completed tickets
 - Understand help desk workflows
-

Ticket Lifecycle

1. Ticket Creation

A user submits an incident or service request through the Jira Service Management portal.

2. Ticket Assignment

The ticket is assigned to an IT Support Technician for investigation.

3. Priority Classification

The ticket priority is determined based on business impact and urgency.

4. Investigation and Troubleshooting

The technician reviews the issue, performs troubleshooting, and documents findings.

5. Resolution

The issue is resolved and detailed resolution notes are added to the ticket.

6. Closure

The ticket is closed after confirming successful resolution.

Scenario 1 – Password Reset Request

Issue Description

A user was unable to access their account due to a forgotten password.

Actions Performed & Outcome Resulted AS

1. Created support ticket.

Description

Employee: Sarah Wilson
Department: Human Resources (HR)

Issue:
Sarah Wilson reported that she is unable to log in to her company account after forgetting her password.

Business Impact:
The user cannot access company resources required for daily HR operations.

Requested Action:
Reset the user password and restore account access.

7. Closed ticket.

The screenshot displays a Jira Service Desk ticket in a web browser. The browser's address bar shows the URL: `sudeep45479.atlassian.net/jira/servicedesk/projects/STHD/queues/custom/11...`. The ticket interface includes a search bar, a '+ Create' button, and an 'Upgrade' button. The ticket is titled 'Add internal note / Reply to customer' and is currently in a 'Closed' state, marked as 'Done'. A 'Pro tip' suggests pressing 'M' to comment. The main content area shows a message from the IT Support Team stating that the printer connectivity issue has been resolved successfully, printer services have been restored, and a successful test print was completed. The message is signed by Sudeep Technologies Pty Ltd. Below the message, there are two internal notes by Sudeep Chaurasiya, both marked as 'Internal note'. The first note details the investigation of the printer connectivity issue, verification of power and network status, restarting the printer and spooler service, and successful test printing. The second note is identical to the first. On the right side, the 'SLAs' section shows a 'Today 03:25 PM' deadline for the first response within 4h and a 'Jun 16 11:25 AM' deadline for resolution within 24h. The 'Details' section shows the knowledge base, priority set to 'Highest', request type 'Get IT help', assignee 'Sudeep Chaurasiya', and reporter 'Sudeep Chaurasiya'. The 'Development' section is also visible at the bottom.

Outcome

Printer functionality restored successfully.

The screenshot shows a Jira ticket interface in a web browser. The browser's address bar displays the URL: `sudeep45479.atlassian.net/browse/STHD-3?visitedUserSeg=true`. The Jira header includes a search bar, a '+ Create' button, and an 'Upgrade' button. The ticket is titled 'STHD-3' and is located within the 'Sudeep Technologies' space. The main content area on the left contains a description of the issue: 'The user requires Adobe Acrobat Reader to view and manage PDF documents.' It details the 'Business Impact' (inability to access customer contracts and PDF documents) and the 'Requested Action' (install Adobe Acrobat Reader and verify successful operation). Below this, there is a 'Similar requests' section and an 'Activity' section with tabs for 'All', 'Comments', 'History', 'Work log', and 'Approvals'. The 'Comments' tab is active, showing a comment from 'Sudeep Chaurasiya' stating that the software installation request has been completed successfully and that Adobe Acrobat Reader has been installed and tested successfully. The comment also includes a 'Pro tip' to press 'M' to comment. The right sidebar contains several sections: 'Resolved' status with a 'Done' button and an 'Automation' dropdown; 'SLAs' showing 'Time to first response within 12h' and 'Time to resolution within 48h'; 'Details' showing 'Knowledge base', 'Priority' (Medium), 'Request Type' (Get IT help), 'Assignee' (Sudeep Chaurasiya), and 'Reporter' (Sudeep Chaurasiya); 'Development' section; 'More fields' section; and 'Automation' section with 'Recent rule runs'.

Skills Demonstrated

- Incident Management
- Service Request Management
- Ticket Prioritisation
- Ticket Assignment
- IT Documentation
- Troubleshooting Processes
- Customer Service
- IT Service Desk Operations
- Jira Service Management

Key Concepts Learned

- Ticket Lifecycle Management
 - Incident Handling
 - Service Desk Operations
 - Escalation Procedures
 - Priority Classification
 - Resolution Documentation
 - ITIL-Based Support Practices
-

Conclusion

This lab provided practical experience using Jira Service Management to manage incidents and service requests within a simulated IT support environment. Activities included ticket creation, assignment, prioritisation, troubleshooting, documentation, resolution, and closure. The project strengthened understanding of service desk operations and demonstrated core skills commonly required in IT Support and Help Desk roles.
